REINFORCING STRONG PERSONAL VALUE SYSTEMS

THE PRIMARY GOAL OF THE JORDAN SCHOLARS PROGRAM (“JSP”) IS TO PREPARE STUDENTS FOR COLLEGE AND LIFE THEREAFTER BY BUILDING AND REINFORCING STRONG PERSONAL VALUE SYSTEMS THROUGH ATHLETIC AND ACADEMIC RIGOR.

It is the belief that by providing a “standard of sports opportunity partnered with a rigorous academic program,” the participating young men and women will develop critical personal values, among which include self-confidence, self-esteem, work ethic, character and commitment to the concept of teamwork and goal setting.

JSP has developed an important initiative as part of The Jordan Scholars educational experience. This initiative is “The JSP Life Skills Program.” The young men and women who are part of The JSP participate in the program to learn about certain Life Skills as follows: Goal Setting Skills, Proper Communication Skills, Cultural & Table Etiquette, Proper Grooming & Attire, Civility & Personal Behavior, Community Service, Money Management Skills, Interpersonal Relationship Skills, Health, Fitness & Proper Nutrition, Empathy, Compassion & Humanitarian Awareness – among others. The Life Skills Program will better prepare JSP students for life beyond McCarthy.

JSP engages the services of outside, third-party experienced professionals to instruct the Scholars accordingly. Each academic year, there are approximately 10-12, 1-hour sessions of instruction for all Jordan Scholars (attendance is mandatory). An incoming Freshman Scholar will attend approximately 40-50 sessions by the time he or she graduates.

Learning and practicing Life Skills is an important step for students as they plan for transitioning into adulthood. The development of personal value systems is critical, as fundamentally, students make their decisions based on their values and beliefs – whether they are personal or are projected on them by their authority figures.
